

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A ~~non-human animal~~ mouse model of Guillain-Barré syndrome which can be obtained by immunizing with gangliosides GQ1b a ~~non-human animal~~ mouse whose FcγRIIB-gene function is deficient in its chromosome to develop Guillain Barré syndrome.
2. (currently amended) A ~~non-human animal~~ mouse model of Guillain-Barré syndrome, wherein Guillain Barré syndrome is Fisher syndrome.
3. (currently amended) The ~~non-human animal~~ mouse model of Guillain-Barré syndrome according to claim 1 or 2, which develops peripheral neuropathy wherein paralysis of its tail and hind legs occurs.
- 4-5. (canceled)
6. (currently amended) A screening method of a therapeutic agent for Guillain-Barré syndrome wherein a test substance is administered to the ~~non-human animal~~ mouse model of Guillain Barré syndrome according to any one of ~~claims 1 to 5~~ claims 1 to 3, to observe and assess the degree of symptoms of Guillain-Barré syndrome in the ~~non-human animal~~ mouse model of the syndrome.

7. (currently amended) A screening method of a therapeutic agent for Guillain-Barré syndrome and/or Fisher syndrome wherein a test substance is administered to the ~~non-human animal~~ mouse model of Guillain Barré syndrome according to any one of ~~claims 1 to 5~~ claims 1 to 3, to measure and assess the level of anti-GQ1b antibody appearance.

8. (original) A therapeutic agent that can be obtained by the screening method of a therapeutic agent for Guillain-Barré syndrome according to claim 6 or 7.
